To whom it may concern,

It has been my pleasure working with Dennis and Anita Lee of Self Builder Services for the past 18 years. The professionalism and care they have provided to their clients is exhibited in each transaction that I have been involved with.

The cost savings can be very substantial by utilizing this builder assist company. The client typically has a great deal more equity in the home at the end of this transaction than with a traditional general contractor.

I would like to take this opportunity to recommend Self Builder Services to anyone interested in building a home. Should you desire any further information regarding this company or the construction process, please feel free to contact me.

Sincerely,

Jami Wilson
Branch Manager
